2002年度第4四半期(1-3月)及び2002年度通期の決算発表(抄訳)

本決算発表に伴うカンファレンス・コールの様様を2003年5月21日22:00よりインターネット上(URL: www.vcall.com)で公開しております。

2002年度第4四半期(1-3月)及び2002年度通期の決算発表 要約

【2002年度第4四半期】

- ・2002年度第4四半期の売上高は130億円(前年同期比7.7%増、前期比23.4%増)で、第3四半期時点での見込み(125~130億円)を若干上回った。依然として景気低迷が続く中、IIJ四半期決算としては、過去最高の売上高を計上し、好調に推移した。
- ・営業損失は446百万円と前四半期(営業損失567百万円)対比改善を示した(前年同期は営業利益186百万円)。今期の営業損失は、主として2003年3月に実施されたIIJグループの本社移転に関わる一時的な費用が原因であり、収益は順調に改善傾向にある。
- ・償却前営業利益(Adjusted EBITDA)は459百万円と、対前年度比では53.0%減少したが、前四半期比では32.0%増加。

【2002年度通期】

- ・2002年度通期の売上高は440億円と、第3四半期の予想通りの結果となった。対前年度比10.3%増でIIJの年度売上高としては過去最高となった。
- ・営業損失は16億円と対前年度比減少。
- ・償却前営業利益(Adjusted EBITDA)は18億円で対前年度比減少。

【2003年度の見通し】

- ・2003年度通期の売上高は、前年度比10%以上の成長を見込んでおり、営業損益の黒字化を目指す。
- ・2003年6月6日に向けて、財務基盤強化を目的とした第三者割当増資の実施を予定している。

概況

大規模案件の受注 法人ブロードバンド市場を狙ったサービス開発・マーケティング戦略が引き続き効果を奏し、リコーグループ向けの大規模メールシステム運用、地方競馬レースのブロードバンド配信、競艇ブロードバンドサイト「KYOTEI B.B.」の構築・運用等、大規模案件を順調に受注した。

IIJグループ横断の新組織の創設 2003年4月1日付でIIJグループ会社4社(IIJ、クロスウェイ コミュニケーションズ、アイアイジェイテクノロジー、ネットケア)を横断する新組織「ネットワーク・インテグレーション部(NI部)」を発足させた。NI部では、垣根がなくなりつつあるシステムと通信の流れを捉え、IIJグループの培ってきた技術的ノウハウを結集し、企業システム及び通信にかかわる企画・開発から保守・運用までの一切について、迅速な開発と提供を行い、激化する市場環境の中で他社との差別化を図っていく。

IIJ Announces 4th Quarter and Full Fiscal Year 2002 Results

*– Record quarterly and annual revenues surpass expectations –
Expected continued revenue growth and positive operating margin in 2003*

Tokyo, May 21, 2003 / New York, May 20, 2003 – Internet Initiative Japan Inc. (Nasdaq: IJJI) (IIJ), one of Japan's leading Internet access and comprehensive network solutions providers, today announced its financial results for the 4th quarter and full fiscal year 2002, ending March 31, 2003 ("fiscal 2002"). On May 21 at 9:00 am (EST), the Company will host a conference call to discuss the results and its outlook. There will be a simultaneous webcast available at www.vcall.com. A replay will also be available at the same URL.

The 4th Quarter and full fiscal year 2002 Results Summary

4th Quarter 2002:

- Revenues totaled JPY 13 billion (\$ 110 million), an increase of 7.7% compared to 4Q01 and 23.4% from 3Q02. Despite the lethargic Japanese economy, IIJ was able to maintain its steady growth, surpass guidance and achieve the highest total revenue amount in the Company's history.
- Operating loss narrowed to JPY 446 million (\$ 3.8 million) from JPY 567 million in 3Q02. This compares to a profit of JPY 186 million in 4Q01. The 4Q02 results include a non-recurring expense related to the IIJ Group's move to its new headquarters in March.
- Adjusted EBITDA⁽¹⁾ was JPY 459 million (\$ 3.9 million), a decrease of 52.6% compared to 4Q01 and an increase of 31.5% from 3Q02.

Full fiscal year 2002:

- Revenues increased to JPY 44 billion (\$ 373 million), a 10.3% increase from the previous year which was in line with our guidance.
- Operating loss was JPY 1.7 billion (\$ 14 million).
- Adjusted EBITDA was JPY 1.8 billion (\$ 15 million).

Outlook:

- For the 2003 fiscal year, IIJ expects total revenues to grow by more than 10% compared to fiscal 2002. The Company also anticipates that operating margins will move into positive territory.
- IIJ expects to raise additional equity capital on June 6, 2003. We believe that the equity capital financing in a private placement will provide IIJ with the financial means to continue the implementation of its growth strategy.

⁽¹⁾ Adjusted EBITDA represents operating income (loss) plus depreciation and amortization. Adjusted EBITDA is provided because it is a measure commonly used by investors to analyze and compare companies on the basis of operating performance. Adjusted EBITDA is not a measurement of financial performance under generally accepted accounting principles and should not be construed as a substitute for operating income, net income or cash flows from operating activities for purposes of analyzing our operating performance, financial position and cash flows. Our adjusted EBITDA is not necessarily comparable with similarly titled measures for other companies.

Note: Translations of Japanese yen amounts into US dollars are solely for the convenience of readers outside of Japan and have been made at the rate of JPY118.07 = US\$1, the approximate exchange rate on March 31, 2003.

Overview of 4Q02 and full fiscal year 2002 Results and Business Outlook

Overview “Despite a difficult economic climate in fiscal 2002, IIJ has continued to implement its strategy for achieving greater shareholder value,” said Koichi Suzuki, President and CEO of IIJ. “Our strategy for the Japanese corporate market has been validated with the addition of several large-scale contracts, including the Ricoh Group, and we have achieved a record level of revenues. In fiscal 2002, we invested heavily in new services that will enable us to increase overall revenues in fiscal 2003 and beyond. We also worked hard to control our international and domestic backbone expenses through contract renegotiations and the rationalization of our infrastructure; we expect the full benefit of these efforts to generate significant cost reductions in 2003 and beyond. Furthermore, we believe that the recent establishment of our Network Integration Division will increase our penetration in the corporate sector, stimulate corporate network outsourcing demand and help improve our cross-selling efforts. Finally, we will soon complete a capital increase that will strengthen the Company’s financial base. We are confident that these measures and our increased focus on high margin products will position IIJ for operating and financial success in 2003.”

Operating Profitability IIJ’s revenues for the fourth quarter were the highest in IIJ’s history and surpassed the Company’s guidance. Despite the non-recurring expenses that were caused by the move to the new headquarters in March, the operating loss in the fourth quarter improved from the previous quarter’s loss, but was worse than the operating profit achieved in the same quarter of the previous fiscal year. The moving expenses are considered an operating cost under US GAAP.

Revenue from the full 2002 fiscal year also marked the highest annual amount in the company’s history. “Unfortunately, this was not sufficient to deliver a full year operating profit. An increase in certain connectivity services revenues was not sufficient to offset a loss of connectivity service revenues. This was the result of contract cancellations by the telecom service arm of regional electric power company and by the shift of several smaller corporate clients from the IIJ T1 Standard Service and the IIJ Economy Service to cheaper services. We do not expect a repeat of such revenue losses and we believe that we will continue to expand our connectivity revenues as has been the case for many years. To make up for the loss of revenues, IIJ launched the OEM service through the CDN (Content Delivery Network) platform and IIJ VPN Standard, a VPN (Virtual Private Network) service in the fiscal 2002 year. Though it will take some time to acquire new customers, we believe that these new services will contribute to make IIJ more profitable in fiscal year 2003. We expect total revenues to grow by more than 10% compared to fiscal 2002,” said Yasuhiro Nishi, CFO of IIJ. In addition, we expect to continue to increase the number of CATV customers. About fifty CATV operators were connected to IIJ, which represents more than 60% of Japan’s CATV Internet market in the 2002 fiscal year.

Capital Improvement Plan IIJ is planning to issue 8,400 new shares of common stock at a price of JPY418,200 in a private placement to third parties. The subscription and payment date for the new shares is expected to be June 6, 2003. We believe that the capital improvement will secure the financial means to allow IIJ to continue the implementation of its growth strategy. "Demonstrating a significant vote of confidence in IIJ's strategy, several major Japanese institutions will increase their financial commitment to IIJ while others will contribute capital for the first time," commented Yasuhiro Nishi. Details for the plan will be announced when finalized.

Strategies for Enterprise Markets IIJ’s focus on the enterprise market, which is based on the Company’s Systems Integration(SI) business and is further supported by company-wide cross-selling efforts, contributed to the Company’s steady growth in fiscal year 2002. Revenue from the SI business increased 33% sequentially as a result of strong demand for network solutions, equipment sales that were directed to the enterprise market.

Internet Initiative Japan Inc.

May 20, 2003

Page 3

Cross-selling IIJ has continued to successfully cross-sell its Value-added, Systems Integration and Data Center Services to existing users of its Dedicated Access Services. “With a strategic marketing focus on Data Center Services and a base of 6,000 corporate customers that value the quality of our technology and support services, IIJ is well positioned to further increase our cross-selling rates in 2003,” said Yasuhiro Nishi, CFO of IIJ. In fiscal year 2002, revenues from IIJ’s top 150 customers accounted for approximately half of the Company’s total revenues. Cross-selling rates for these customers in fiscal 2002 year are detailed in the following table.

Approximate Cross-selling rates among Top 150 Customers in fiscal 2002

The following table shows the percentage of Dedicated Access Service customers who also use our Value-added Service, our System Integrations Service and our Data Center Service.

	Value-added Service		System Integration		Data Center Service	
	2001	2002	2001	2002	2001	2002
Dedicated Access Service	69.7%	70.6%	49.2%	58.2%	30.4%	35.3%

Change in the Organizational Structure In an effort to continuously maintain our competitive advantage, IIJ brought together parts of IIJ, Crosswave Communications, IIJ Technology and NetCare in order to create a new division called the “Network Integration (NI) Division,” as of April 1, 2003. This division groups all technology and information platforms, from the planning and development to the maintenance and operation of various services. This division will make it possible to rapidly respond to demand in the construction of network communication systems for enterprises

Status of Overview and Business Outlook

This Overview and Business Outlook contains forward-looking statements and projections, such as statements regarding future total revenues and operating profitability, that are subject to known and unknown risks and uncertainties that could cause actual results to differ materially from those expressed or implied by these statements. These risks and uncertainties include, but are not limited to, the factors noted at the end of this release and to the risk factors and other information contained in IIJ’s filings on Form 20-F and Form 6-K, as well as other filings and documents furnished to the Securities and Exchange Commission. IIJ plans to keep this press release publicly available on its Web site (www.iij.ad.jp), but may discontinue this practice at any time.

4th Quarter and full fiscal year 2002 Operating Highlights

Large-Scale Contracts

Several major Japanese companies awarded large-scale contracts to IIJ during the 4th quarter, including the Ricoh Group and Japan Leisure Channel. In February 2003, IIJ won a large-scale outsourcing contract for email gateway solutions, “IIJ Mail Gateway service,” from the Ricoh Group, one of the world’s leading suppliers of office automation equipment. In March, the Japan Leisure Channel Co. Ltd. (JLC) chose the IIJ Group to build and operate a large-scale broadband motorboat racing site called “Kyotei B.B.” where IIJ “CDN JAPAN” service has been utilized.

Additionally, IIJ launched “IIJ Web Gateway Service,” a new security service that will be provided in cooperation with IIJ Technology Inc. (IIJ-Tech), our 64.1% owned subsidiary. The service meets a variety of enterprise needs by providing proxy-caching server operation and management functions that boost Web access efficiency.

Service Development

IIJ has continued to develop new services. In 4Q02, IIJ developed the IIJ SEIL Management Framework system (IIJ SMF), the world’s first network service operating system that enables corporations to substantially automate network configuration, and realize “plug-n-join” network services to control all networking processes, including network construction and operation. Customers

Internet Initiative Japan Inc.

May 20, 2003

Page 4

can enjoy large cost reductions for the construction of network configurations by using this system. In addition, IIJ recently launched a new outsourcing solution of web-access filtering, "IIJ URL Filtering Service," to enable corporate customers to block access from their internal network to undesirable web sites in order to improve their productivity. IIJ's subsidiary, Net Care, Inc., launched a new IP (Internet Protocol) telephony solution service for enterprises. The new service provides a comprehensive VoIP (Voice over IP) solution that seamlessly integrates the operation of telephone and data networks. The service includes consulting, equipment selection, system construction and implementation, supervision, operation and maintenance.

Data Center

In January 2003, Crosswave Communications Inc. (a company which IIJ owns 37.9%) opened new data centers in Yokohama and Saitama. Unlike conventional data centers, these two new data centers offer a full range of integrated network and SI (Systems Integration) services that use the IIJ Group's extensive range of network, system and engineering resources. The two new data centers are linked to other IIJ Group data centers nationwide, which help in dispersing capacity while providing further system back-up.

Network Infrastructure Development

In 4Q02, IIJ increased the capacity of seven of its domestic backbone network lines. IIJ also upgraded its US backbone network that runs between Los Angeles, California and Ashburn, Virginia.

R&D (IPv6)

In March 2003, IIJ launched a new IPv6 (Internet Protocol Version 6) service called "IPv6 Gateway Service". The new service will target leading companies in a variety of different industries. Besides offering IPv6 connectivity through IIJ's network, the service provides approximately 3×10^{26} IP addresses (a block of /40) per contract, which enables customers to roll out their own IPv6 services by assigning an IP address to each of their products or services. Hitachi Ltd. has already contracted this service from IIJ.

Appointment of IIJ Engineers as IESG & IAB Members

In March 2003, two of IIJ's engineers were appointed as Members of IESG* (Internet Engineering Steering Group) and IAB* (Internet Architecture Board). Mr. Randy Bush, Chief Scientist of IIJ America, has become a Member and Area Director of IESG and is responsible for the Operations & Management area. Dr. Jun-ichiro Itojun Hagino, a senior researcher in the IIJ Laboratory, is serving as a Member of IAB. The assignments are two-year terms and are effective from March 2003 until February 2005.

*IESG and IAB are organizations which are part of the IETF (Internet Engineering Task Force), which is a large open international community of network designers, operators, vendors, and researchers who are concerned with the evolution of the Internet's architecture and the smooth overall operation of the Internet. The IETF activities are grouped into eight areas, which are administered by the IESG Area Directors. The IAB is an international organization that provides architectural oversight and adjudicates appeals of complaints.

4th Quarter of FY2002 Financial Results

Revenues

Revenue in 4Q02 totaled JPY13,036 million, an increase of 7.7% compared to 4Q01, and an increase of 23.4% compared to 3Q02.

Connectivity and value-added services revenue was JPY5,419 million in 4Q02, a decrease of 7.3% compared to 4Q01 and a decrease of 2.6% compared to 3Q02.

Internet Initiative Japan Inc.

May 20, 2003

Page 5

Dedicated access services revenues were JPY3,341 million in 4Q02, a decrease of 8.3% compared to 4Q01 and a decrease of 1.8% compared to 3Q02. The decrease in year-over-year comparison was mainly due to the cancellation by the telecom service arm of a regional electric power company, but in sequential comparison, the downward trend in dedicated access services is being compensated by the rapid revenue growth of IIJ FiberAccess/F service(10-100Mbps) and the steady growth of Data center connectivity service.

Dial-up access service revenues were JPY765 million in 4Q02, a decrease of 9.4% compared to 4Q01 and a decrease of 1.4% compared to 3Q02. The revenues of IIJ's various OEM services, which include NTT's regional L-mode service and other network services that use the CDN platform, increased steadily, which offset the decline of IIJ4U service and other dial-up services for corporate customers.

Value-added services revenues increased 13.2% to JPY931 million in 4Q02 compared to 4Q01 and 2.0% compared to 3Q02. These increases were mainly due to the revenue growth of security related services.

Systems integration service revenues decreased 8.0% to JPY4,905 million in 4Q02 compared to 4Q01, but increased 33.2% compared to 3Q02.

Equipment sales revenues were JPY2,712 million in 4Q02, an increase of 190.4% compared to 4Q01 and an increase of 105.7% compared to 3Q02. These revenues included sales of network equipment for the educational industries and governmental agencies, which we expect to develop as significant clients for our SI business.

Table 1. Number of Contracts

Internet Access Services	4Q02	3Q02	4Q01
<i>IP Service</i> 64kbps – 128kbps	112	130	142
192kbps – 768kbps	35	37	42
1Mbps – 2Mbps	268	279	270
3Mbps – 1.2Gbps	248	212	156
<i>Internet Data Center Connectivity Services</i> ⁽²⁾	156	139	110
<i>Others</i> ⁽³⁾	4,489	3,922	2,900

Internet Initiative Japan Inc.

May 20, 2003

Page 6

Cost and expenses

Cost of total revenues was JPY11,919 million in 4Q02, an increase of 11.3% compared to 4Q01, and an increase of 24.1% compared to 3Q02.

Backbone Costs

International backbone costs were JPY315 million, a decrease of 28.8% compared to 4Q01 and a decrease of 27.0% compared to 3Q02.

Domestic backbone costs were JPY1,075 million, an increase of 28.6% compared to 4Q01 and an increase of 19.2% compared to 3Q02. These increases were a result of an increase in connection fees with NTT's regional access networks (FLET'S).

Table 4. Backbone Costs (JPY in millions)

	4Q02	3Q02	4Q01
International Backbone Costs	315	432	443
Domestic Backbone Costs	1,075	902	836

Cost of SI (Systems Integration) revenues

Cost of SI revenues was JPY 4,248 million in 4Q02, a decrease of 10.3% compared to 4Q01 and an increase of 33.9% compared to 3Q02. The gross margin ratio for SI improved to 13.4% in 4Q02 compared to 11.2% in 4Q01, and was almost flat compared to 3Q02.

Sales and Marketing Expenses

Sales and marketing expenses were JPY789 million in 4Q02, an increase of 5.5% compared to 4Q01 and a decrease of 11.8% compared to 3Q02.

General and administrative expenses

General and administrative expenses were JPY662 million in 4Q02, an increase of 37.7% compared to 4Q01 and an increase of 29.3% compared to 3Q02. General and administrative expenses for 4Q02 included the cost of the move to new office.

Operating loss

The operating loss was JPY446 million in 4Q02 as compared to the operating income of JPY186 million in 4Q01 and a loss of JPY567 million in 3Q02. The operating loss for 4Q02, net of the cost of the move to the new headquarters, improved considerably from the previous quarter due mainly to the steady growth of our SI business. The operating income (loss)-to-revenue ratio for 4Q02 was (-)3.4%, compared to 1.5% in 4Q01, and to (-)5.4% in 3Q02.

Other expenses

Other expenses for 4Q02 were JPY360 million, compared to JPY338 million in 4Q01 and JPY228 million in 3Q02. Other expenses for 4Q02 were mainly composed of a JPY175 million impairment loss on certain equity security investments and a JPY190 million interest payment.

Equity in net loss of equity method investees

Equity in net loss of equity method investees amounted to JPY1,254 million in 4Q02, compared to JPY1,647 million in 4Q01, and JPY1,375 million in 3Q02. This is mostly attributed to the equity loss in Crosswave.

Net loss

Net loss was JPY2,137 million in 4Q02, compared to JPY1,667 million in 4Q01 and JPY2,266 million in 3Q02. Basic net loss per ADS equivalent was JPY(-)47.52 in 4Q02, compared to JPY(-)37.07 in 4Q01 and JPY(-)50.40 in 3Q02.

Company Information

Founded in 1992, Internet Initiative Japan Inc. (IIJ, NASDAQ: IJJI) is Japan's leading Internet-access and comprehensive network solutions provider. The company has built one of the largest Internet backbone networks in Japan, and between Japan and the United States. IIJ and its group of companies provide total network solutions that mainly cater to high-end corporate customers. Services range from the delivery of new generation network services over an optical-fiber infrastructure that is optimized for data communications, to the construction of pan-Asian IP backbone networks. The company also offers high-quality systems integration and security services, internet access, hosting/housing, and content design.

Statements made in this press release regarding IIJ's or management's intentions, beliefs, expectations, or predictions for the future are forward-looking statements that are based on IIJ's and managements' current expectations, assumptions, estimates and projections about its business and the industry. These forward-looking statements, such as statements regarding 4Q02 and fiscal year 2002 total revenues and operating profitability, are subject to various risks, uncertainties and other factors that could cause IIJ's actual results to differ materially from those contained in any forward-looking statement. These risks, uncertainties and other factors include: IIJ's expectation that net losses will continue; IIJ's ability to raise additional capital to cover its accumulated deficit; IIJ's ability to continue to increase subscribers to its connectivity services, particularly at higher bandwidths; IIJ's ability to generate significant revenues from its other services such as systems integration; the success of IIJ's investments in Crosswave; the ability to compete in a rapidly evolving and competitive marketplace; the impact of technological changes in its industry; and other risks referred to from time to time in IIJ's filings on Form 20F of its annual report and other filings with the United States Securities and Exchange Commission.
